This report documents my first attempts of using Git and GitHub to version control an RStudio project. I will be modifying, committing changes and then pushing to GitHub

Let's create a plot of distance (miles) and speed (mph)

```
plot(cars, col = 'red', xlab = 'speed (mph)', ylab = 'distance(miles)')
```

A summary of the data frame is given below

```
library(knitr)
```

```
## Warning: package 'knitr' was built under R version 3.6.2
```

```
kable(summary(cars))
```

speed	dist
